

Cooper Maughan

he/him/his | Salt Lake City / Provo, UT | mcooperjay@gmail.com | [LinkedIn](#) | [GitHub](#) | [WhatsApp](#)

Profile

Statistics major at Brigham Young University, graduating December 2026, with hands-on experience in regression, Bayesian methods, Biostatistics and machine learning through research, consulting, and teaching roles in the BYU Department of Statistics. Comfortable moving between technical modeling work and explaining results to non-technical audiences. Seeking a January 2027 analyst or data science role before starting a master's program in Fall 2027.

Experience

Statistical Consultant | BYU Statistics Consulting Center

Provo, UT — Sep 2026 – Present

- Advise campus researchers and community clients on study design, methodology selection, and interpretation of statistical results.
- Translate statistical findings into plain-language recommendations for clients without a quantitative background.

Research Assistant | BYU Department of Statistics — CorEx Systems Project

Provo, UT — Jan 2026 – Present

- Build and train PyTorch models on GPU compute clusters, applying deep learning and information-theoretic methods (mutual information, total correlation) to ongoing department research.
- Collaborate with faculty and researchers using Git/GitHub for version control on shared modeling code in Python and Jupyter Notebooks.

Teaching Assistant | BYU Department of Statistics — STAT 121/250

Provo, UT — Aug 2025 – Apr 2026

- Teach and troubleshoot statistical modeling, R programming, and data analysis workflows for undergraduate students; support instructors with grading and content development.

Teaching Assistant | BYU Salt Lake Center — MPA 630

Salt Lake City, UT — Jan 2025 – Apr 2025

- Taught statistical methods and quantitative reasoning to graduate students; graded assignments and provided one-on-one support in Excel and statistical tools.

Education

Brigham Young University — Provo, UT

B.S. Statistics, Biostatistics Emphasis | Expected December 2026

- Coursework: statistical modeling, regression, Bayesian methods, machine learning fundamentals, computational statistics, time series & autoregressive modeling

Skills

Programming: Python, R, SQL, MATLAB

Familiar with: PyTorch, Tableau

Tools: pandas, NumPy, Matplotlib, RStudio, Git/GitHub, Jupyter Notebooks, Excel, scikit-learn

Methods: Regression modeling, Bayesian inference, supervised learning, experimental design, EDA, time series & autoregressive modeling, data cleaning

Leadership & Involvement

- Winner, 2026 BYU Statistics Case Study Competition, using a correlated autoregressive model to map NYC city council districts with reported rodent rates
- President, BYU Sports Analytics Association (2026–2027)
- Member, BYU Statistics Association and Mu Sigma Rho National Statistical Honor Society
- Volunteer Missionary, Church of Jesus Christ of Latter-day Saints — South Africa/Lesotho/Eswatini (2021–2023): led weekly coordination meetings, mentored incoming volunteers
- Additional leadership: Student Advisory Council representative; Fellowship of Christian Athletes president
